

List of PHS award mechanisms which require disclosure under the 2011 revised regulations

The 2012 implementation of the PHS regulation applies to all research activities supported by a PHS agency, including:

- Research grants, cooperative agreements and contracts
- Career development awards
- Center grants
- Conference grants
- Individual fellowship awards
- Infrastructure awards
- Institutional training grants
- Program projects
- Research resources awards

To determine if a project requires disclosures, see the Activity Codes (e.g., R01, T32, S10) and descriptions of funding found at http://grants.nih.gov/grants/funding/ac_search_results.htm

- Disclosure is required for projects with a D, F, K, L, M, P, R, S, or T prefix
- Disclosure is required for many, but not all, with a U prefix
- Disclosure is probably not required for a C, G, H, I, V, or X prefix, unless UCLA is a subrecipient conducting a research component
- Contact RPC for help at rpchelp@research.ucla.edu if you are unable to determine if disclosure is required

The only research award programs that are excluded from the regulation are Small Business Innovative Research (SBIR) and Small Business Technology Transfer Research (STTR) Phase I applications.
